Latest Updates from WA Government:

- Households who have not yet received their free 15 RATs have been emailed and can choose to pick up their RATs from any collection point, or have their RATs redelivered to their address.
- People who are collecting their household RAT allocation must show the email they received when they selected to collect their RATs.
- Close contacts with no symptoms can collect their free RATs at a range of metropolitan vaccination clinics and testing clinics in the regions (subject to availability).
- You will need to wear a mask when collecting your free RATs (in line with close contact protocols) and, take your RAT before coming in.
- Please do not attend regional emergency departments for RAT collection.
- You'll be required to verbally confirm that you are a close contact and will be able to collect RATs for other close contacts within your household, to a maximum of 30 RATs.

What Chung Wah Community Care is doing:

- Mask wearing and temperature checks remain at Balcatta Hub, Northbridge Hub and Willetton Hub.
- Hub drivers for shared transport must record each client’s temperature before the client enters the vehicle. Clients with one-on-one transportation will have their temperature checked before entering the hub.
- Closely monitor the overall wellbeing of all staff, volunteers and clients/participants and provide relevant guidelines if there is a COVID related situation.

How you can help to prevent the spread of coronavirus:

- Wear a mask while receiving service or out in the community.
- Stay home if you are unwell and inform your Case Coordinator.
- Respiratory hygiene and cough etiquette: cough or sneeze into a tissue and discard the tissue immediately, or cough/sneeze into the bend of your elbow, perform hand hygiene.
- Cleaning and laundry: regular cleaning of the environment and equipment, safe handling of linen and waste.
- Inform your Case Coordinator if you or your household are symptomatic, in close contact and in isolation, or you have been tested COVID positive.
